DynamicVoid
Digital Track Void Meter

Dynamic Void Unit - *JKDS19034-1K*

What's Included:
(1) Dynamic Void Unit

IN ACTION

"FEEDBACK FROM THE FIELD"

"We do not want slow orders on our track and this device helps me get them off the tracks fast by getting exact dynamic vertical deflection."

Norfolk Southern Track Inspector

PATENTED

KEY FEATURES

- Measures vertical deflection under dynamic load
- Easy installation (magnetize to the web of rail)
- 3 seconds to set up
- Automatically turns on and records when a train passes
- Digital and manual readings for measurement
- Measures in millimeters or inches

WHAT'S MEASURED

Track Voiding - Vertical Track Deflection

EASY INSTALLATION

Just magnetize to the web of the rail.

FTSRAIL

FTSRail.com | info@ftsrail.com | (973) 397-5213

Simple Operation

1. 
Magnetize to the rail.

2. 
Touch the base to the ballast

3. 
Zero your unit out.

4. 
Let a train pass and measure vertical deflection.

Measure Vertical Rail Deflection Under Full Dynamic Load
